THE CITY OF TORONTO.

The City of Toronto is situated on the northern shore of Lake Ontario, nearly due north from the mouth of the Niagara River. It lies on a plateau gradually ascending from the Lake Shore to an altitude of 220 feet, and covers an area (not including land covered by water and the Island opposite the City) of about 17 square miles. It is generally level with slight depressions at points where minor water courses formerly existed. The River Don flows through the eastern part of the City, and the River Humber along its western limit. The harbor in front of the City (a square mile in area) is formed by an island lying to the south of it.

The name of the City is of Indian origin, meaning "a place of meeting," the site in early times being a rendezvous for Indian tribes for council or war-like expedition. It first appears as a centre of trade in 1749, when the French built a fort and started a small trading settlement under the name of Fort Rouille. Its occupancy, however, was not long undisturbed, as British traders appeared soon from the south, and in the war between France and England the fort was burned in order to prevent English occupation in 1759.

CITY OF TORONTO—*Continued.*

Governor Simcoe chose the site of the City for the Capital of the Province of Upper Canada, and changed the name to York in honor of the Duke of York, son of the then King George III. The town was occupied by the U. S. forces in 1813, and the Legislative Assembly and archives were burned. Self-government was granted in 1817, and in 1834, the population having increased to 9,000, it was incorporated as the City of Toronto.

Since then its progress has been rapid and substantial, the population doubling every twenty years, until it is now the second city of the Dominion, and rapidly approaching first place. It is noted for its many fine public and other buildings, its parks and beautiful shade trees. The City being the Capital of Ontario, the business of the Province is carried on in the Parliament Buildings, a magnificent brownstone structure, beautifully situated in Queen's Park.

As a location for manufacturing and commercial establishments the City possesses many advantages for the production of almost every class of goods. The growth of the City in every direction is so noticeable that little need be said to prove its claim of having the most favorable conditions for the production and distribution of goods. It has water communication east and west to many important centres, to tide water and to more than one-half

the way across the continent, and has railways to provide exceptional trade handling facilities. In addition to the foregoing advantages, the City will, without doubt, in a short time be in a position to offer to manufacturers an abundant supply of cheap power from Niagara Falls.

The government of the City is vested in a Municipal Council, consisting of the Mayor and four members, forming the Board of Control (all five being elected annually by the citizens at large), and eighteen Aldermen (three being elected annually from each of the six Wards into which the City is divided.) The Council as a whole is the legislative body of the municipality, and carries on its legislative work through standing committees in the usual way. The Board of Control is the executive body, and as such is responsible for the preparation of the annual estimates and the supervision of matters relating to finance, the appointment of officials, the carrying on of public works authorized by the Council, and the general administration of the affairs of the City, except as to the Departments of Education and Police, the first being under the control of a Board of Education, elected by the citizens, and the latter under the Board of Police Commissioners, which consists of the Mayor, for the time being, the County Judge and the Police Magistrate.

City Hall.

The City Hall, situated on Queen Street West, between James and Teraulay Streets, is a massive brown stone structure, and contains accommodation for the Council and Officers of the Municipality, for the Board of Education and its Officers, and for the Courts of Justice (including the Police Court) and the various Judicial Officers connected therewith.

The site, expropriated in 1884, was originally intended for Court House purposes only, but it was subsequently decided to erect a combined City Hall and Court House thereon. The corner stone was laid on the 21st day of November, 1891, by the Mayor, the late Edward F. Clarke, M.P., and the work of construction continued for eight years, the building being formally opened for public business on the 18th September, 1899, by the Mayor, John Shaw, Esq.

In the tower of the building is a massive clock of British manufacture (the largest winding clock on the continent), and three bells, which are used for striking the quarter hours, half hours and the hours.

The dimensions, cost, etc., of the building are as follows:

Frontage	289 feet
Depth	283 feet
Circumference	1,328 feet
Total floor space	5.40 acres

CITY HALL—*Continued.*

Height of tower from sidewalk ..... 300 feet
Diameter of clock face .....20 feet

Weight of bells: smallest (quarter bell), 1,904 pounds; next largest (quarter bell), 3,339 pounds; largest (hour bell), 11,648 pounds.

The total cost (including site, clock, bells, and furniture), will not exceed $2,500,000.

City Assets and Revenues.

(*From the City Treasurer's Budget.*)

In considering the City debt, the value of the property and other assets possessed by the City should not be overlooked. The estimated value of this property is over $18,000,000, and a large amount of it is revenue producing. This valuation is exclusive of all the public works and services of the City which have been provided at heavy cost to the taxpayers, and, though not available assets, are required for public use and convenience. The water lots owned by the City, the walks and gardens and other leasehold property, with the Market Block, yield an annual revenue of about $160,000, which will increase from year to year as the leases mature and are renewed. The total revenue from the City properties, exclusive of the Water Works, is about $168,000, and at 3½ per cent. represents a capital of over $4,800,000. In addition the City derives a revenue from licenses, police court fines, cattle market and weigh-house fees, and the street railway service (exclusive of that derived from the Water Works), of about $780,500. The estimated revenue this year from the Water Works is $540,000. These, with other revenues, bring the annual revenue of the City to upwards of $1,740,728, exclusive of the amount raised by taxation.

Births, Marriages and Deaths.

The number of births, marriages and deaths in the City of Toronto during the year 1907, as shown by the Registration returns is as follows:

Births	6,715
Marriages	3,614
Deaths	4,562

All births and marriages must be registered at the City Clerk's Office, City Hall, within 30 days from the occurrence thereof.

Deaths must be registered at the same office before a permit to bury can issue.

Parents, or occupants of dwellings where births occur, are required to register births.

Clergymen officiating are required to register marriages.

Physicians attending are required to certify as to deaths.

Neglect or failure to register in either case renders parties liable to a fine not exceeding $10 and costs.

Public Health.

The death rate of the City is 15.21 per thousand of the population.

The public hospitals in the City are located as follows:

Toronto General Hospital, Gerrard Street East.

St. Michael's Hospital, Bond Street.

Sick Children's Hospital, College Street.

Western Hospital, Bathurst Street.

PUBLIC HEALTH—*Continued.*

Grace Hospital, College and Huron Streets.

St. John's Hospital, Major Street.

Riverdale Isolation Hospital for Contagious Diseases, Gerrard Street East.

The ordinary ambulances for cases of non-contagious diseases are under the control of the Police and answer to the call of "Main 222." The ambulance for cases of contagious diseases is in connection with the Health Department, and answers to "Main 1746."

In all complaints of nuisances—drop a post card to the Health Department.

In case of accident, the patient, if of adult age and conscious, has the right to state to what hospital or where he wishes to be taken. In cases of children or those in an unconscious condition, the medical attendant, and in cases where there is no medical attendant, the Police, are supposed to direct the ambulance.

In cases where a person is found dead and no medical man has been in attendance, a coroner should be notified, who has authority to issue a warrant to bury after view, or order an inquest, as he may deem necessary.

*An additional rate of $\frac{85}{100}$ths of a mill, producing $118,419, levied this year for school purposes.

† The large increase in the assessment for 1906 will be noted. This is the first assessment under the new Assessment Act which instituted the business assessment in lieu of the assessment of personal property. The increase of upwards of eighteen millions of dollars may be estimated as follows: On land, two millions; on buildings, seven millions; on business assessment (in lieu of the assessment of personal property), six millions; and on income, three millions. The assessment of North Rosedale, amounting to $326,000, is not included in above, as under the terms of the proclamation annexing the territory to the City, the taxation is to be four mills less than the general City rate for a term of twelve years.

Street Lighting.

Number of arc lights in use.....	1,395
Number of gas lamps in use.....	1,035

Arc lights cost 19c. per light per night.

Local Improvement Works.

When the owners of property on any street or lane desire a sewer, sidewalk, pavement or curbing, or when the property owners in any locality desire the opening, widening, extension or diversion of any street or lane, application should be made to the City Engineer for a form of petition to the Council for the work or improvement. When such petition is signed by two-thirds in number of the owners representing more than one-half in value of the property to be benefited by the work or improvement, the Council may proceed therewith and assess the cost against the property benefited.

LOCAL IMPROVEMENT WORKS—*Continued.*

If the names of two-thirds in number of the property owners representing more than one-half in value of the property cannot be obtained, the petition may nevertheless be presented to the Council, and if the Council on the recommendation of the City Engineer finds that the work is necessary, and in the public interest, it may direct that it be proceeded with, unless a majority of the property owners interested representing more than one-half of the value of the property to be assessed petition against the proposed work or improvement within a month after the Council gives notice of its intention to proceed with such work.

Notwithstanding any petition to the contrary, the Council, if it deems the same necessary in the public interest, and by a two-thirds vote of the whole Council, may proceed with any of the above-mentioned works and assess the cost thereof against the property benefited.

The following tables prepared by the City Engineer shew the approximate annual cost of different classes of permanent pavements and sidewalks,. Similar information as to sewers cannot be given owing to variations in the cost of excavating different grades of soil. The City Engineer, however, will furnish an estimate as to the cost of sewers upon application being made therefor by property owners interested.

Fire Alarm Telegraph.

Directions to Give an Alarm.

Upon what may appear as correct information of a fire near your signal box, break the glass, unlock the signal box door and pull the brass hook on the inside door all the way down (once only) and let it go. If you are within hearing distance of the fire alarm bells or gongs, and do not hear the alarm sound in less than fifteen seconds, go to the next nearest box to the fire and do as before directed. The hook should not be pulled while the alarm is being sounded from some other box, nor before the expiration of at least thirty seconds after the alarm has ceased. No alarm should be given for a chimney only on fire, and no box

FIRE ALARM TELEGRAPH—*Continued.*

should be pulled more than once for the same fire, except by an officer of the Fire Department.

Never open the box or touch the hook except in case of fire.

Never give an alarm except from the box nearest the fire, unless you have first ascertained that the box nearest the fire will not work.

Do not try to take the key out of the door, as it is "locked in" and cannot be taken out without a relief key.

On the grounds are erected the following buildings:

Administration Building—A large commodious building which includes a Post Office, Bank, Customs Office, Banquet Hall, and public offices for the general management of the Exhibition.

Manufactures and Liberal Arts—This building is built entirely of brick and steel, with a floor space of 95,000 square feet.

Machinery Hall and Electrical Building — This building is especially designed for heavy machinery and machinery in operation. It is

equipped with ample steam power and shafting for the purpose, and has a floor space of 35,000 square feet.

Process of Manufacture and Implement Building—This is a modern brick and steel structure with 86,000 square feet of floor space. So far as can be learned, this is the only Exhibition building in the world devoted exclusively to the practical demonstration of Process of Manufacture.

Art Gallery.—This building, erected on the most approved plan of fire-proof construction, is the largest and most complete fire-proof Exposition Art Gallery on the continent.

Dairy Building—This building is built of cement blocks and has a floor space of 25,000 square feet. It is equipped with an up-to-date cold storage plant, and has in addition a fire-proof Auditorium which has a seating capacity of 1,500, which is used for lectures, demonstrations, butter and cheese making competitions, etc.

Horticultural Building—This building, built in the form of the letter "E," has a floor space of 45,000 square feet and is constructed of pressed red brick and steel with stone facings. It is the handsomest Exhibition Building on the Grounds, having a dome which reaches the height of 100 feet.

INDUSTRIAL EXHIBITION—*Continued.*

Railway Exhibits Building—Built by the principal Railway Systems of Canada for the exhibition of cereals, fish, game, minerals, views and agricultural products of the country. This is an exceptionally handsome building, having three wings or courts—one for each of the leading railway systems.

Other Buildings—Other separate buildings for exhibits are:—Agricultural Building, Women's Building, Honey Building, Stove Building, Poultry, Pet Stock and Dogs.

There are also separate buildings for telephone, telegraph, police and fire protection purposes.

Live Stock Buildings—Comprise 26 Horse Stables, accommodating 1,400 animals; 16 Cattle Stables, accommodating 1,200 animals; 14 Swine Buildings, accommodating 900 animals; 4 Sheep Buildings, accommodating 600 animals.

Grand Stand—The new Grand Stand has a length of 725 feet and a seating capacity of over 16,000 people. It is absolutely fireproof, the construction being of steel, reinforced concrete and brick. It overlooks a beautiful half-mile race track. In front of this Stand the Special Attractions and Fire-works are displayed.
